

Pair Programming

Exercise: Different Roles in Pair Programming

You will be split up into 2 groups :
driver and navigator

Add sticky notes to write down the tasks and responsibilities of the role

7 min.

miro.com

What is Pair Programming?

A rally car, white with red and blue accents, is driving through a muddy puddle, splashing water. The car has 'COURIER' on the windshield and 'SIMPSON' and 'Wolf' on the hood. The license plate is 'AA 429-17'. The background is a dirt road with some greenery on the left.

Navigator

- › Observes the written code to identify defects
- › Asks questions
- › Participates in brainstorming & planning
- › Focuses the direction of the work

Driver

- › Writes code
- › Explains actions taken
- › Participates in brainstorming & planning

The Seven Pillars

Pair pressure

- Focus each other and avoid distraction

Pair courage

- Agree of a partner adds confidence

Pair debugging

- Easier debugging in pairs

Pair trust

- Pairs get to know each other better

Pair negotiation

- Work together to get the best solution

Pair review

- Continuous review of the code

Pair learning

- Learn from each other

More Pair-Programming Styles aka Techniques

UNSTRUCTURED

- Often the default
- No protocol

STRONG-STYLE

"For an idea to go from your head into the computer it MUST go through someone else's hands"

Llewellyn Falco

PING PONG

Switching based on protocol

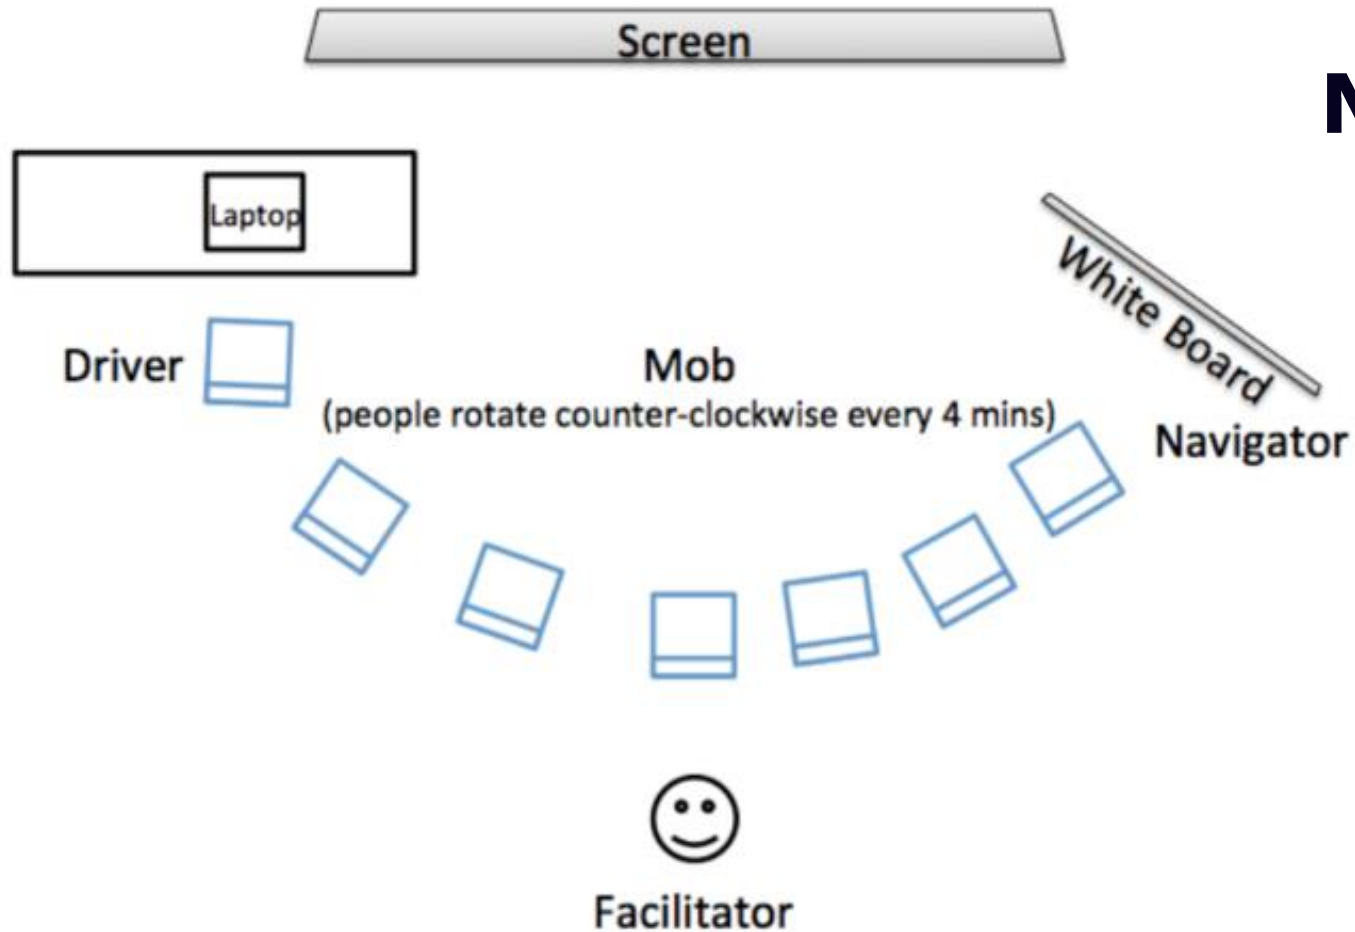

For example

- test – code –test
- after 30 minutes

Effects on Quality

Quality - Separate Programming

Quality - Mob Programming

Exercise: Benefits of Pair Programming

Discuss the benefits of Pair Programming in your group

Add sticky notes to write down your ideas

7 min.

miro.com

Benefits of Pair Programming

Higher quality code

- Immediate reviews
- Multiple perspectives
- Developers from different areas

Enhances Teamwork

- Better communication skills
- Better cooperation skills
- Get to know each other better
- Better understanding of people's skills

Knowledge Transfer

- Learn from their partners
- Rotation of pairs

Fewer Bugs

- Early defect detection

More fun

- Social interaction

Guidelines

Avoiding Poor Ergonomics

- Two monitors
- Two keyboards

Personal Hygiene

- Take a shower
- Wear deodorant

Clean Workspace

- Free of clutter
- Free of distractions

No extra windows

- Close all not related windows
- Close Email & Chat

Respect each other

- No teacher/student relationship

Stay focused on the task

Shu-Ha-Ri Learning Model - Concepts

Shu-Ha-Ri learning model is a Japanese martial art concept describing the stages of learning to mastery (Wikipedia 2016)

Source: Martin Fowler: <http://martinfowler.com/bliki/ShuHaRi.html>, Alistair Cockburn (2006): Agile Software Development

Skill levels and combination

Don't forget

You can be a Master in a discipline and a beginner in another!

SHU – HA

HA – RI

- › Normal combination
- › Best learning effects

SHU – SHU

- › Avoid if possible

RI - RI

- › Only for a short time
- › Critical tasks with high impact

Smells

**Mentoring, Teacher/
Student relationship**

Worker / Rester pairing

Ongoing discussions

Poor Ergonomics

No pair switching
